SUMMARY

A highly driven Mathematics graduate student at Universitas Indonesia with a strong interest in data science, analytics, and business development. Experienced in data analysis, data visualization, SQL querying, and database management through internship and academic experiences. Skilled in Python, SQL, Google Data Studio, and data modeling with numerous model predictions. Through various leadership and organizational experiences, consistently demonstrates strong analytical thinking, problem solving, and teamwork skills. Eager to further develop expertise and contribute in the field of data analytics and business-driven decision making.

EDUCATION

Hacktive8 Bootcamp

Hacktive8 Full Time Data Science Program | Current Score: 99%

April 2026 – June 2026

Universitas Indonesia

Bachelor Degree of Science (B.Sc.) in Mathematics | Current GPA: 3.45/4.00

July 2022 – February 2026

SMAN 99 Jakarta

Natural Science Major

July 2019 – May 2022

- The 10th Highest Cumulative Score of 2022 Natural Science Major Students

WORK EXPERIENCES

PT. KIMIA FARMA, TBK

Big Data Analytics Intern

July 2024 – August 2024

- Gained expertise in Data Warehouse process flow, the creation and importance of Data Marts, Big Data concepts, and Data Pipeline management.
- Executed operations involving Common Table Expressions, basic SQL queries, and developed a deep understanding of Database Management Systems, including Create, Select, Update (Alter), and Delete (Drop) Table operations.
- Engaged in Data Analysis and Data Visualization tasks within Salesforce and implemented it in the sales dashboard.
- Created a final project regarding the performance analysis of Kimia Farma Year 2020 - 2023.

ORGANIZATIONAL EXPERIENCES

Lecturer and Laboratory Assistant for Numerical Differential Equation

Universitas Indonesia

February 2025 – June 2025

- Undertaking the responsibility of teaching and instructing second-year students in programming languages, with over 70 students in each section.
- Teaching fundamental programming languages including MATLAB and Octave. Creating and updating a novel teaching course system for second-year students, which involves generating new teaching materials and timelines.
- Creating problems that need to be solved by first-year students with the fundamental knowledge of MATLAB and Octave.
- Evaluating the performance of the first-year students through assignments given by Lecturer and Laboratory Assistant.

Laboratory Assistant for Numerical Methods

Universitas Indonesia

February 2024 – June 2024

- Undertaking the responsibility of instructing first-year students in programming languages, with over 50 students in each section.
- Teaching fundamental programming languages including Python and LaTeX. Creating and updating a novel teaching course system for first-year students, which involves generating new teaching materials and timelines.
- Collaborating and coordinating with over 15 laboratory assistants.
- Creating problems that need to be solved by first-year students with the fundamental knowledge of Python and LaTeX.
- Evaluating the performance of the first-year students through assignments given by Laboratory Assistants.

Lecturer Assistant for Introduction to Data Science

Universitas Indonesia

February 2024 – June 2024

- Taking responsibility for teaching more than 40+ students as additional lessons regarding the mentioned course to increase their understanding on the subject.
- Evaluating the performance of more than 40+ students through assignments given by Lecturers.
