

Prayoga Rasyid Sudrajat

Aspiring Data Scientist

Jakarta, Indonesia | +6281281915755 | prayogarasid26@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

Results-oriented Physics graduate from Universitas Padjadjaran with a strong analytical foundation and hands-on experience in manufacturing environments and data-driven project management. Currently enrolled in Hacktiv8 Data Science Bootcamp, gaining hands-on exposure to Python, SQL, ETL processes, data visualization, and machine learning fundamentals. Proven track record in leading large-scale student organizations and executing complex data analytics projects. Passionate about translating raw operational data into actionable business insights to drive efficiency and revenue growth.

EDUCATION

Hacktiv8 Bootcamp

Data Science Program.

Jakarta, Indonesia

04/2026 - 07/2026

Padjadjaran University

Bachelor of Science (Outstanding Student Nominee of Department of Physics Unpad)

Sumedang, Indonesia

2021 – 2026

WORK EXPERIENCE

PT Asahimas Flat Glass

Management Information System Intern

Cikampek, Indonesia

August 2024 – June 2024

- Supported a manufacturing improvement initiative by developing a sales data warehouse to enhance reporting accuracy and data accessibility across departments.
- Enhanced reporting visibility by creating structured analytical outputs that allowed stakeholders to monitor production performance and quality trends.
- Created a data warehouse using SSIS, SSAS, and SSMS to perform ETL processes ensuring there is no data leakage, improving production evaluation processes.

ORGANIZATIONAL EXPERIENCE

Student Energy at Unpad

President

Cikampek, Indonesia

December 2022 – December 2023

- Achieved 75% of annual organizational objectives by implementing structured OKRs goal-setting and cross-department performance evaluation.
- Led a 28+ member cross-functional organization, overseeing 7 functional divisions to ensure strategic alignment and execution discipline.
- Positioned the organization as a Nominee for Most Collaborative Semi-Autonomous Student Organization at Universitas Padjadjaran.

SKILLS

General Skills: Data Analysis, Machine Learning, Data Communication, Leadership.

Programming Language: Python, SQL, JavaScript, HTML, CSS.

Visualization Tools: Tableau, Looker Studio.

Libraries / Framework: Scikit-learn, Streamlit, Pandas, Numpy, Matplotlib, Seaborn, Scipy, Feature-Engine, BeautifulSoup, Selenium.

Tools: PostgreSQL, Hugging Face, Google BigQuery, Vercel, SSIS, SSAS, SSMS.

Techniques: Time Series Analysis, Forecasting, Feature Engineering, Dimensionality Reduction, ETL.

Modeling Algorithms: Regression, KNN, Random Forest, Decision Trees, XGBoost, and Clustering.

PROJECTS

[Data Job Market in Indonesia](#) [\[Visualization\]](#)

March 2026

Web scraping and visualization project to analyze data job market trends in Indonesia using real data from Jobstreet in a span of 1 month.

Technology / Tools: Python, Pandas, Selenium, Tableau, BeautifulSoup

Vending Machine Sales Optimization [\[Vercel\]](#)

June 2024

Developed an interactive and responsive dashboard combining business analytics with over 1,400 transactions and front-end engineering to support vending machine performance monitoring.

Technology / Tools: HTML, CSS, JavaScript, SQL, BigQuery, Chart.js, Vercel, Looker Studio, Wireframe.

CERTIFICATIONS

DeepLearning

Supervised Machine Learning: Regression and Classification

Certificate: [PN3MCHM89A69](#)

Issued on February 2024
